

TACKLE POSITIONING

TACKLE: View from Above

= Referee (arrow in direction referee is facing)

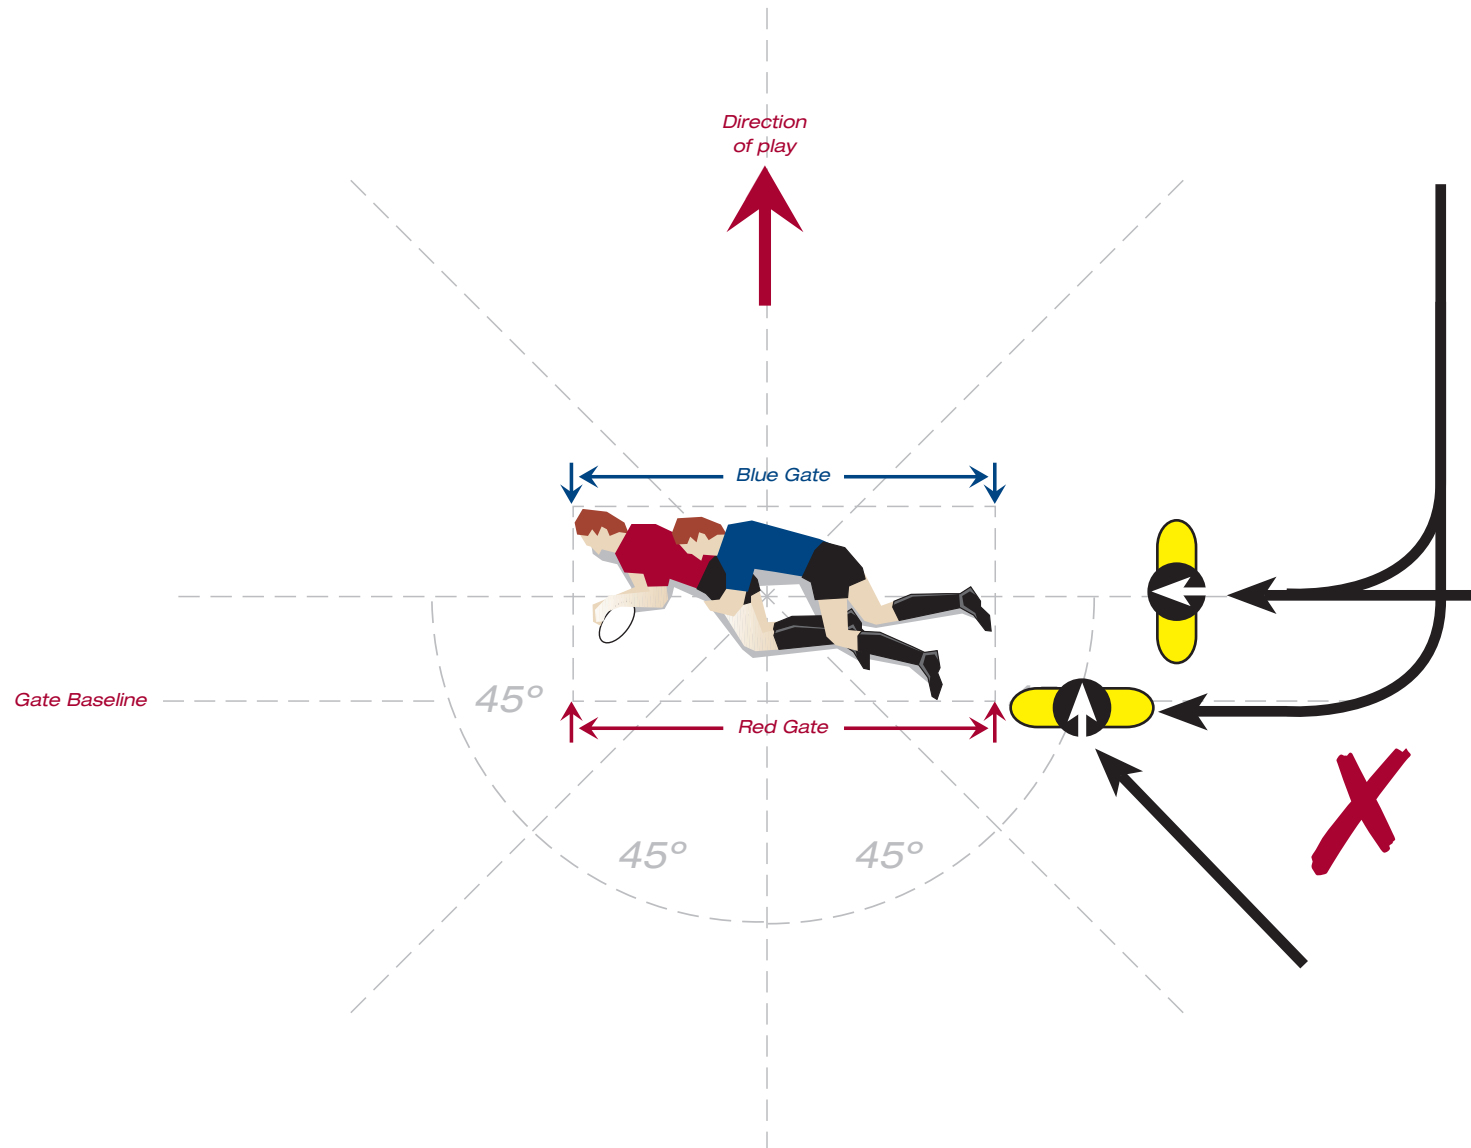

Tackle arrival from the right hand side, move into a 45° position, and a few steps back from the baseline of the gate, shoulders parallel to the goal lines (north/south)

TACKLE: View from Above

= Referee (arrow in direction referee is facing)

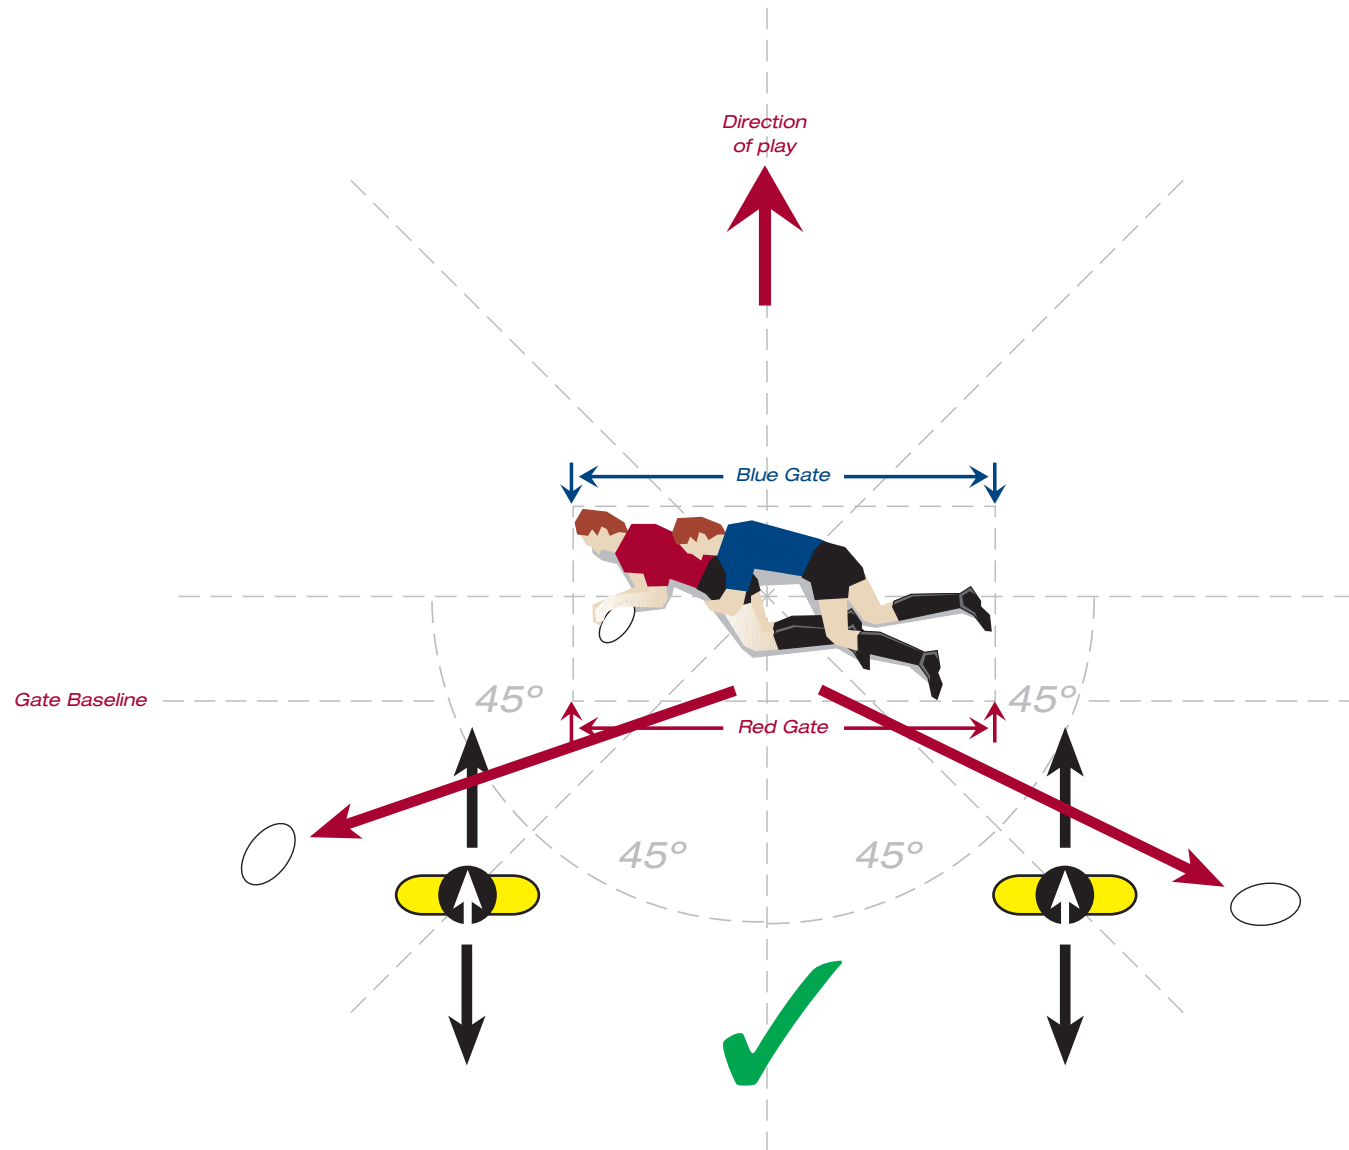

Tackle arrival - these are poor choices, square on, or too flat and often you have very little opportunity to have a clear view of the ball or of players arrival through the gate

TACKLE: View from Above

= Referee (arrow in direction referee is facing)

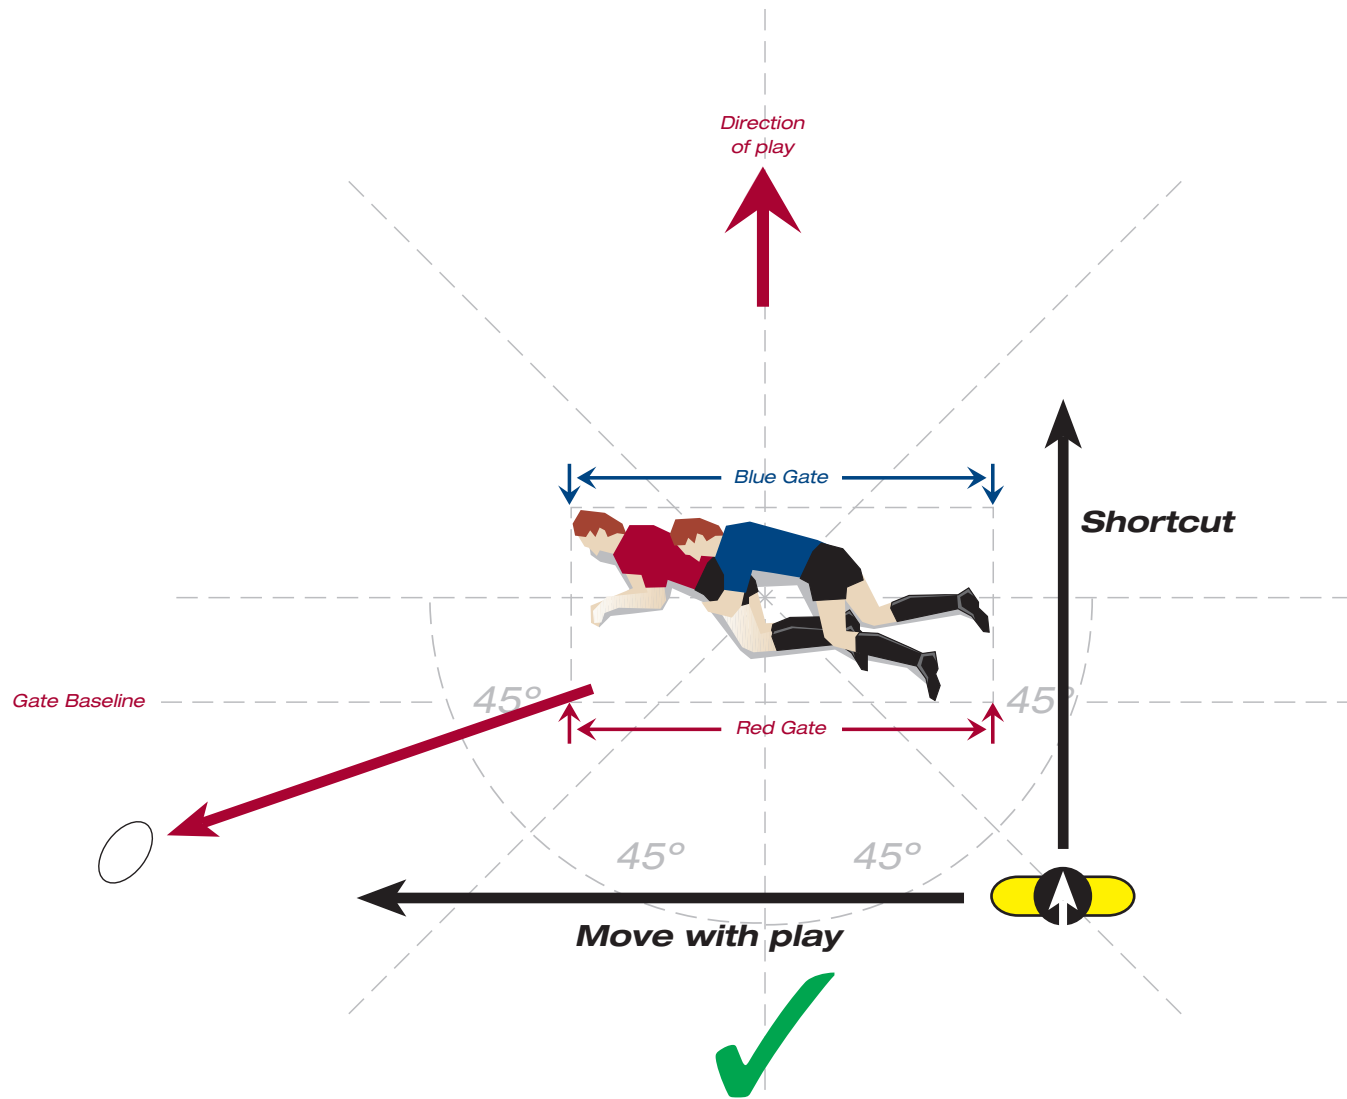

Quick ball passed to your side, keep moving forward or step back out of the way

TACKLE: View from Above

= Referee (arrow in direction referee is facing)

Quick ball passed away from your side, move with play or take a shortcut if necessary

TACKLE: View from Above

= Referee (arrow in direction referee is facing)

Ruck forms, ensure ball is secured, then move out to manage the offside lines. Ensure you are outside of the crash ball lane

TACKLE: View from Above

= Referee (arrow in direction referee is facing)

If you move out too flat (on the offside line, you minimise your peripheral view of the ball and the backlines, thus, having to turn your head more either way to see.

TACKLE: View from Above

= Referee (arrow in direction referee is facing)

If you move out being a few steps behind the offside line of the team in possession you maximise your peripheral view of the ball and the backlines, thus, NOT having to turn your head more either way to the ball or the backlines across the field.
